Mayur Pai

Cloud Platform & GenAI-Centric Full Stack Engineer

+91 9611609185 | mayur5pai@gmail.com | linkedin.com/in/mayur-pai5 | github.com/mayurpai | mayurpai.github.io

Professional Summary

Software Engineer II with **3+ years of progressive experience** building scalable **cloud platforms**, **distributed systems**, and **AI-powered full-stack solutions** for enterprise environments. Currently contributing to **Nike's global multi-cloud platform engineering ecosystem**, enabling secure, governed infrastructure for business-critical and athlete-facing workloads. Strong expertise in **Kubernetes and cloud-native platforms**, **observability**, **automation**, and **platform governance**, with hands-on exposure to **Generative AI**, **RAG pipelines**, and **LLM-enabled workflows**. Proven ability to translate complex business problems into reliable, production-grade systems while collaborating closely with senior engineers, architects, and product teams.

Technical Skills

Programming & Frameworks: Java, Python, Go, JavaScript, TypeScript, C/C++; Spring Boot, Spring Microservices, FastAPI, Flask, Rasa, REST APIs.
Frontend & UI: React.js, Next.js, Bootstrap, Tailwind CSS, SASS, HTML5, CSS3, Responsive Design.
AI/ML & LLMs: Generative AI, Large Language Models (LLMs), Machine Learning, Deep Learning, NLP, Retrieval-Augmented Generation (RAG), LangChain, Hugging Face, Streamlit, Chainlit, Chatbot Development, Model Fine-tuning, PEFT, QLoRA, LLaMA 2, Azure OpenAI, AWS SageMaker.
Cloud Platform & Kubernetes: Microsoft Azure (Azure OpenAI, AKS, Key Vault, Cognitive Services), AWS, Google Cloud Platform, Kubernetes, Control Plane Architecture, Custom Resource Definitions (CRDs), Cluster Auto-Scaling, Platform Governance.
DevOps & Reliability: Docker, Kubernetes, Jenkins, GitLab CI/CD, GitHub Actions, CI/CD Pipelines, Linux, Nginx, Distributed Systems, Automation.
Databases & Tools: PostgreSQL, MySQL, MongoDB, Redis, Neo4j, Graph Databases, SQLAlchemy, Postman, Git, Maven, Gradle, VS Code, Eclipse, WindSurf, JUnit, Mockito.

Professional Experience

Nike — **Dec 2025 – Present**
Software Engineer II — *Bagmane Tech Park, C. V. Raman Nagar, Bengaluru, India*

- Building and evolving **cloud platform engineering solutions** powering Nike's **global multi-cloud ecosystem**, enabling scalable, secure, and governed infrastructure for business-critical and athlete-facing workloads
- Designing, developing, and operating **cloud-native and Kubernetes-based platforms**, working deeply with **control plane architectures**, **custom resource definitions (CRDs)**, and **cluster auto-scaling** strategies
- Contributing to **Airlift**, a **migration-as-a-service platform** that enables application teams to move into **secure, platform-managed cloud accounts** with built-in governance and near-zero friction
- Supporting **platform-led migrations** across **AWS workloads** (**EC2, ECS, Lambda**), abstracting migration complexity behind repeatable workflows owned end-to-end by the platform team
- Integrating **observability, monitoring, and automation** across platform services using tools like **Splunk**, improving system reliability, visibility, and operational efficiency at scale
- Collaborating closely with **senior engineers, architects, and product partners** across Nike's Global Technology organization to align platform capabilities with long-term engineering and organizational priorities
- Gaining exposure to **AI-, ML-, and GenAI-enabled workflows** within platform engineering contexts, supporting intelligent automation and next-generation infrastructure capabilities

Endava Solutions India Private Limited (formerly GalaxE. Solutions) — **Aug 2022 – Dec 2025**
Senior Developer (Promoted: Associate → Developer → Senior) — *ITPL., Whitefield, Bengaluru, India*

- Delivered **8 diverse projects** across **healthcare**, **banking**, and **AI** domains, demonstrating rapid adaptability and cross-functional expertise
- Architected enterprise log analyzer for **Fiserv** (Fortune 500 fintech) using **Streamlit** and **Castle Framework APIs**, reducing manual analysis time by **70%** through automated **Splunk** metrics extraction
- Led Generative AI chatbot development for **SOPHiA GENETICS** with **RAG pipelines**, **Azure OpenAI**, and **AKS** deployment, achieving **85% faster resolution** and **120+ hours/month** savings
- Architected **ETL** platform (**GxCapture**) using **FastAPI/Python** for high-volume pipeline automation and developed **GxBot** with **LLaMA 2**, **Redis**, and **AWS Sagemaker** for NLP workflows
- Delivered **GxWave** pharmacy analytics platform using **Spring Boot/React** with **ML forecasting** and created **GxCodeDescriptor** LLM-based pseudocode generator with **Neo4j** integration, improving onboarding by **40%**
- Started as trainee on **GxClaims**, building full-stack applications with **Spring Boot**, **React**, **JUnit**, and **PostgreSQL** integration

- Mentored **4 junior developers**, accelerating productivity by **40%** through architectural guidance and technical coaching, while resolving **50+ critical blockers** across backend, platform, and AI workflows

Featured Projects

Airlift – Cloud Migration as a Service Platform
Nike | Infrastructure Engineering | Dec 2025 – Present

- Contributed to **Airlift**, an internal **migration-as-a-service platform** enabling adoption of **secure, governed managed cloud accounts** with near-zero friction for application teams
- Supported platform-led migrations across **AWS workloads** (**EC2, ECS, Lambda**), enabling standardized environments without disrupting delivery timelines
- Implemented **platform-managed infrastructure patterns** with built-in **security guardrails, governance controls, and break-glass access**
- **Impact:** Improved platform adoption and enabled scalable, governed cloud usage across engineering teams

Agentic AI Support Chatbot
SOPHiA GENETICS | Feb 2025 – Apr 2025

- Built end-to-end **Generative AI assistant** using **Streamlit**, later scaled to **React.js + PostgreSQL** stack for enterprise deployment
- Integrated **RAG workflows** with **Redis** and **Azure Search** for real-time, contextual documentation retrieval
- Enabled multimodal processing (PDF, Word, image) via **Azure Computer Vision** OCR and **Azure OpenAI** inference
- Deployed on **Azure Kubernetes Service (AKS)** with **Docker** containerization and **GitLab CI/CD**
- Implemented **logging, monitoring, and prompt-level observability** to track model responses and system behavior
- Collaborated with support stakeholders to refine **prompts, retrieval strategies, and response quality**
- **Impact:** Reduced L1 resolution from 15+ mins to under 2 mins, saving **120+ hours/month**

GxBot – Enterprise Chatbot Platform
Customer Support Automation | Apr 2024 – Sep 2024

- Built enterprise chatbot using **FastAPI**, **Redis**, and **AWS SageMaker**, fine-tuning **LLaMA 2** with **PEFT/QLoRA** for domain-specific NLP
- Implemented advanced NLP pipelines for **intent recognition**, **entity extraction**, and **dynamic prompt generation**
- Applied **design patterns** (Chain of Responsibility, Strategy, Factory, Singleton) to ensure scalable and modular architecture
- Integrated with **ManageEngine Service Desk Plus** for automated ticket creation and escalation workflows
- **Impact:** Reduced support response time and automated **60%** of routine inquiries

Engineering Calculator – Academic Web Platform
Independent Project | Feb 2026

- Built a **production-grade academic web platform** providing **SGPA, CGPA, and CGPA-to-percentage calculations** for engineering students
- Designed **semester-wise computation workflows** with strict validation to ensure accuracy across multiple grading schemas
- Architected the platform for **discoverability and scale**, enabling sustained organic adoption through search-driven usage
- Deployed and maintained as a **publicly accessible application**, serving real users in a self-service model
- **Impact:** Established a widely adopted academic utility used by students to track, verify, and validate academic performance

Recognition & Achievements

- Awarded **Outstanding Contribution** and **Trainer Awards** at Endava Solutions for high-impact project delivery and mentoring junior developers
- Generated **110,000+ clicks and 567,000+ impressions** in three months via SEO-optimized websites, tracked using Google Search Console
- Earned **Elite Silver Certification** in *Introduction to Programming in C* from NPTEL (national-level recognition)
- Completed verified **LinkedIn Skill Assessments** across C, C++, HTML, CSS, JavaScript, React, Git, and SEO

Education

Sahyadri College of Engineering and Management — **Graduation: July 2022**
Bachelor of Engineering in Information Science Engineering — *Adyar, Mangalore, India*
GPA: 9.31/10.0 | Top-Ranked Scholar

- Graduated with **top academic distinction**, consistently ranking among the highest performers in the program
- Developed strong foundations in **software engineering, data structures, algorithms, and systems design**
- Relevant Coursework: Machine Learning, Data Structures & Algorithms, Database Management Systems, Computer Networks & Security, Software Engineering Principles & Practices, Object-Oriented Programming, Unix & Shell Programming
